Media Contact Database

Access a global, carefully-maintained database of journalists, editors, publications and media outlets. The Media Contact Database is used to research journalists, build targeted press lists and support accurate outreach at global, regional, national or continent-wide level.

Press Release Distribution

Deliver press releases directly to journalists and newsroom systems worldwide using targeted delivery and editorial review. Press Release Distribution supports global campaigns, geographic and language-specific targeting, multilingual distribution and detailed tracking and reporting

Online Syndication

Publish press releases across a global network of established news and information websites. Online Syndication supports long-term visibility, public access and search discovery and operates independently from direct journalist delivery.

Features

- Research & Target
- Distribute
- Publish Online
- Monitor
